

The New Serial Killer in Texas: **TEXTING AND DRIVING**

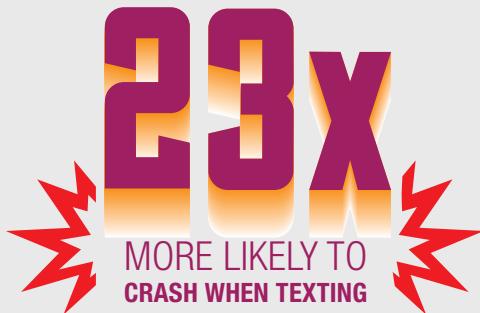

9 AMERICANS ARE KILLED EVERY DAY FROM DISTRACTED DRIVING ACCIDENTS

1.3 MILLION CRASHES IN 2015 WERE TEXT RELATED

28% OF ACCIDENTS ARE TEXT RELATED.

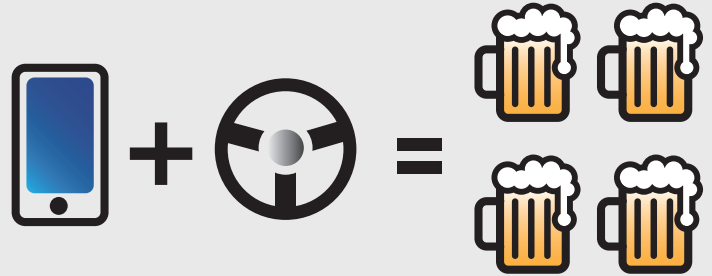

23x MORE LIKELY TO CRASH WHEN TEXTING

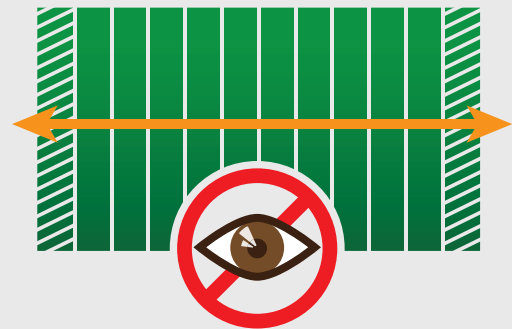

1 IN 5 DRIVERS CONFESS TO SURFING THE WEB WHILE DRIVING

TEXTING AND DRIVING IS LIKE DRIVING AFTER 4 BEERS

ANSWERING A TEXT TAKES ABOUT FIVE SECONDS. TRAVELING AT 55 MPH, THAT'S ENOUGH TIME TO TRAVEL THE LENGTH OF A FOOTBALL FIELD.

NEARLY 1 IN 5 CRASHES IN TEXAS INVOLVES DRIVER DISTRACTION

100,825 TRAFFIC CRASHES IN TEXAS INVOLVED DISTRACTED DRIVING

3,214 SERIOUS INJURIES

468 DEATHS

HERE ARE WAYS TO STOP TEXTING WHILE DRIVING. PLEASE SHARE WITH FRIENDS AND LOVED ONES!

AT&T DriveMode

By limiting the extra features on your phone, DriveMode automatically sends pre-set replies to incoming texts to let people know you are driving. Once the app is selected, all calls, texts and emails are silenced, and the app blocks you from reading or typing anything.

DriveSafe.ly

Instead of completely blocking your incoming messages, DriveSafe.ly actually reads your text messages, calls or emails aloud. By reading to you, the app eliminates that urge to grab your phone and take your eyes off the road for a split second.

Textecution

For those who really don't want to mess around, Textecution uses GPS to determine speed at which your car is moving. If you are traveling more than 10 mph, the application will disable texting, so you cannot receive or respond to texts.

DriveScribe

DriveScribe's app measures and evaluates your driving performance by giving you points, based on how well you stay within the speed limit and obey traffic signals. Users can redeem points for gift cards and discounts at certain stores.

Text-STAR

Part auto-text responder, part digital personal assistant, Text-STAR aims to get you where you need to go without any distractions. Able to sense motion, the app disables texting when you drive 10 mph or more.
